

# NEW E-INVOICING APPLICATION

On **Wednesday, December 8, 2010**, over 600 Pratt & Whitney customers (not suppliers) will be able to register for a new Online Services application called E-Invoicing. Customers will have the ability to see invoices associated with their Payer Code in our SAP system. These invoices are related to Spare Parts, Part Repair, Engine Overhaul, Line Maintenance Services (LMS) and Repair Support Logistics (RSL) with more Pratt businesses to be added in the future. To register, log into Online Services at [www.portal.pw.utc.com](http://www.portal.pw.utc.com) and use the ***Request New Resources*** link on the **Home** community page.

Some of the features of this new application include...

- Summary report for up to 13 months of invoices
- Invoice number hot-linked to individual invoice detail
- Quick and easy download to Excel
- Includes customer P.O. number
- Includes a quick email template for easy data sharing
- All information driven by SAP Payer codes
- Search multiple P.O. or invoice numbers from Excel using upload feature.

The system also includes special reporting for part repair and can also display estimate summaries used in our overhaul shops. For more information, please contact **Robert McKay** at [robert.mckay@pw.utc.com](mailto:robert.mckay@pw.utc.com).
